ANMOL MISHRA

AI/ML Engineer · Full-Stack Developer (Next.js · Flutter) · Technical Lead

RAG Pipelines · LLM Agents · Vector Databases · Voice AI · Python · Firebase | 3+ Years | Govt & Product Deployments | 2 Acquired Products

Email: mishraanmol258@gmail.com | **Phone:** +91-7275299418 | **Location:** Noida / Mau, India | **GitHub:** github.com/anmolmishra99 | **LinkedIn:** linkedin.com/in/anmolmishra99

PROFESSIONAL SUMMARY

AI/ML engineer and technical lead with 3+ years shipping production AI for Indian government bodies and SaaS. Government systems built for municipal and district offices serve 21.6K citizen conversations and track Rs. 7,531 Cr of land-acquisition compensation across 16,375 land records. Two self-built SaaS products acquired in 2024 (toasty.ai, launchpage.me); co-founded Payge (payge.store) and built vela.video (autonomous AI motion graphics engine).

TECHNICAL SKILLS

AI / ML	RAG Pipeline Design · LangChain (Agents, Chains, Tools, Memory) · CrewAI (Multi-Agent Orchestration, Role-based Agents, Task Delegation) · Vector DBs: Pinecone · LLM Prompt Engineering · Voice AI (Whisper, STT/TTS) · AI Agent Orchestration
Frontend	Next.js (App Router, SSR, API Routes) · React 19 · Tailwind CSS · Flutter (iOS & Android) · Remotion · Web Components
Backend	Python (FastAPI, Flask) · Firebase (Firestore, Auth, Cloud Functions) · REST APIs · Razorpay Route Split Payouts · Smart Contracts
Engineering	System Design · Code Review & Mentoring · Agile / Sprint Delivery · Govt Tech Client Discovery · API Documentation
Tools	Git · GitHub · Postman · VS Code · Figma (Design Handoff)

KEY ACHIEVEMENTS

- **Built AI Mitra**, a RAG citizen chatbot for Chh. Sambhaji Nagar Municipal Corporation & Smart City — 21,596 conversations, 58,706 messages and an estimated 16,197 citizen-hours saved.
- **Delivered eSulabh**, a blockchain land acquisition system with an AI layer for Palghar Collector Office — tracks Rs. 7,531 Cr compensation across 16,375 land records and 221 villages.
- **Built Sanvichar** (sanvichar.online), an AI board meeting platform for Shivshahi Punarvasan Prakalp Ltd (Govt Board) — hosted 3 live board meetings with bilingual transcription and resolution tracking.
- **Two self-built SaaS products acquired in 2024**: toasty.ai → Lumination.ai (USA) and launchpage.me → Canadian entrepreneur.
- **Built Payge** (payge.store), an Indian Shopify for social sellers — 100+ live seller stores, automated Razorpay Route payouts (95% to seller, 5% to Payge) and an AI growth engine.
- **Built vela.video** (vela.video), an AI motion graphics video engine with Remotion and Gemini API — 3.3K unique visitors, 4.7K page views with complete client-side on-device export.
- Worked directly with government officials, district collectors, and Smart City programme officers to formulate technical specs and deliver high-uptime systems.

ENGINEERING EXPERIENCE

AI/ML Engineer & Technical Lead — Arixolve Ventures Pvt Ltd · Noida, India · 2022 – Present

Led engineering, architecture, and client delivery across product and government project portfolio; direct client discovery with District Collectors and Smart City programme officers.

Project 1 · AI Mitra — AI Citizen Chatbot — Chh. Sambhaji Nagar Municipal Corp & Smart City

Python · LangChain · CrewAI · RAG · Pinecone · FastAPI · Next.js · Voice AI · STT / TTS

- Built a production RAG chatbot grounded on official municipal documents (chunking, embeddings, semantic retrieval). In production it has handled 21,596 conversations and 58,706 messages, averaging 2.7 messages per conversation (~3 turns per citizen).
- Saved citizens an estimated 16,197 hours (971,820 min) and delivered 8,806 official links straight into chat. Top intents: Development Plan (DP), property tax, occupancy and marriage certificates.
- Ultra-high precision: only 0.5% of queries (100) were flagged as complex needing human follow-up.
- Serves English (92%) and Marathi (8%), with voice input and output (STT/TTS) for non-technical citizens.
- Built a CrewAI reporting crew (data analyst, trend detection, report writer) summarizing query clusters directly for municipal leadership.
- Shipped the Next.js citizen portal (chat UI, voice toggle, query history) with the design team.

ENGINEERING EXPERIENCE (CONTINUED)

Project 2 · eSulabh — Blockchain Land Acquisition System + AI Layer — Palghar Collector Office

Blockchain · Smart Contracts · Python · LangChain · RAG · Next.js · Firebase · AI Agents

- Built the AI and analytics layer of a land-acquisition tracking system for 10+ mega infrastructure projects (expressways, freight corridor, rail), 16,375 land records and 221 villages: tracking Rs. 7,531 Cr total compensation across 3,313 Ha of land.
- Contributed to on-chain data models and smart contracts (approval sequencing, invalid-state rejection) making ownership transfers and multi-party approvals tamper-proof.
- Built role-scoped RAG: access enforced directly in retrieval queries so officers only retrieve their division's records.
- Added public citizen lookup: landowners track compensation status with mobile + Gat number after official clearance.
- Delivered 6 one-click executive intelligence reports for the Collector (Collector Briefing, Bottlenecks, Financials, Timelines, Pending Cases, Structure Report).

Project 3 · Sanvichar — AI Board Meeting Platform — Shivshahi Punarvasan Prakalp Ltd (Govt Board)

Python · Whisper STT · LLM · Next.js · Firebase · Bilingual NLP · Marathi · sanvichar.online

- Hosted 3 live government board meetings transcribed and structured in real time.
- Built real-time Whisper transcription with structured extraction of agenda items, decisions, action points, and recorded votes.
- Generated bilingual (English + Marathi) summaries and official resolution text for Maharashtra government documentation.
- Built a diff-aware notes review editor ensuring secretariat review before finalization, plus direct resolution certificate generation from votes.

Project 4 · Payge — Indian Shopify for Social Sellers — payge.store · Co-founder & CTO

Next.js · Firebase · Tailwind CSS · Razorpay Route · Instagram API · LLM Agents

- Built Payge, enabling social sellers to launch single-product online stores with checkout, orders, and analytics in one place. Handled 100+ live stores, 30K+ tracked events, 14K page views, and 2K unique visitors.
- Implemented Razorpay Route with partner OAuth onboarding, automatically splitting every sale: 95% straight to seller bank account and 5% to Payge with zero manual payouts.
- Built Growth OS: connects seller and competitors' Instagram accounts, analyses top-performing reels from past 7 days via Instagram API, and AI generates weekly viral content hooks.

SHIPPED PRODUCTS · 2 ACQUIRED (2024)

toasty.ai — Testimonial Collection SaaS — Acquired by Lumination.ai (USA) · 2024

Next.js · Web Components · Firebase · Multimedia CDN · Micro-SaaS

- Multi-tenant SaaS for automated testimonial collection. Handled and stored 10+ GBs of multimedia testimonials (video, audio, text) and rendered them seamlessly on client websites via custom Web Components (HTML tag). Designed custom embed widgets, wall-of-love displays, and automated review collection sequences. Bootstrapped to paying MRR; acquired by Lumination.ai (USA) in 2024.

launchpage.me — Startup Validation Tool — Acquired by Canadian Entrepreneur · 2024

Next.js · Firebase · Tailwind CSS · Viral Growth · Landing Page Builder

- Conversion-focused no-code waitlist builder and startup idea validator. Enabled early-stage founders to launch high-converting landing pages with viral milestone referral mechanisms and automated email capture in under 60 seconds. Acquired by a Canadian entrepreneur in 2024.

vela.video — AI Motion Graphics Engine — Active · 2024 – Present · https://www.vela.video/

Next.js · Remotion · Gemini API · Motion Graphics · WebCodecs · On-Device Export

- Autonomous motion graphics video engine combining Remotion composition skills with Google Gemini API for automated script-to-visual generation. Scaled to 3.3K unique visitors, 4.7K page views, and 3.6K+ sessions with strong organic acquisition (1.2K Google organic, 558 ChatGPT organic, 1.7K direct). All video rendering and export executes client-side on-device with zero server GPU overhead.

EDUCATION

B.Tech – Computer Science & Engineering · Dr. A.P.J. Abdul Kalam Technical University (AKTU) · 2023 · 70%

- Relevant coursework: Data Structures & Algorithms, Machine Learning, DBMS, Computer Networks, Operating Systems. Began building AI/web systems and freelance government tech during final year — transitioned directly into full-time technical lead & engineering post-graduation.
